William,

Here is the revised quote based on current costs. We had a 25% price increase since April, (tariff wood) but we are eating some of it and we only increased the quote slightly. Let me know if you have any questions.

All the best!

We would like that you send vector art via email to j@jsignsinc.com Vector art is usually created in Adobe® Illustrator as a vector based EPS, AI, or PDF file format. If you do not have this type of format, please send the highest resolution file you have and we will try and convert it to the correct format. If we can, we will take the raster image and convert it to vector. Most of the time this works, however if your art file is too low resolution to convert, your artwork may need to be redrawn, which may incur additional charges (depending on the complexity of the artwork). Converting or redrawing artwork may also add additional days to production.

Vector Files:

Line art, scalable to any size and never loses resolution; image will stay crisp and clean. EPS, AI(CS5 or lower), or PDF. Be sure to convert all fonts to outlines or curves.
